

## Manual of Forestry, Vol. 3 (Classic Reprint)

Excerpt from Manual of Forestry, Vol. 3. In the Preface to the first volume of this Manual I intimated that the work would comprise the following parts: -I. The Utility of Forests. II. Principles of Sylviculture. III. Formation, Regeneration, and Tending of Woods. IV. Forest Finance. V. Forest Working Plans. VI. Forest Protection. VII. Forest Utilization. Parts I. to V. have been dealt with in this and the two previous volumes. My colleague, Mr. W. R. Fisher, has translated Dr. Hess' excellent work on Forest Protection. That work will appear almost simultaneously with this volume, and take its place as Volume IV. of this series. Mr. Fisher has also commenced the translation of Dr. Gayler's classical work on Forest Utilization, which will be published towards the end of the present year, and make the fifth and final volume of this Manual. Under these circumstances I have now completed the task which I set myself at starting. That task consisted in providing, in the first place, text books on the various branches of forestry for the students at Coopers Hill College. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com). This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
