

What is knowledge?: A practical review of six philosophical perspectives (Perspectives on Knowledge Management Book 1)

Knowledge Management practitioners often make the distinction between Data, Information, Knowledge and Wisdom this is the so-called DIKW pyramid but then little is said about the Knowledge component in this scheme. In this article, Luc Glasbeek points out that there is more to knowledge than meets the eye and that there is value in reflecting on the nature of knowledge. This article is for Knowledge Management practitioners who have never really thought about knowledge in earnest. The author hopes they will find some insight and inspiration in this paper and that it will whet their appetites to learn more about the philosophical connotations of knowledge. To help tie this papers content into the everyday issues facing Knowledge Management practitioners, several Over to you sections are included, with questions for reflection and discussion.
