

Star Struck: Seeing the Creator in the Wonders of Our Cosmos

The heavens are beckoning us, telling us that this wonderful, mind-boggling cosmic display is indeed the work of the creator. And now, using rovers and satellites, we're venturing further out into the vastness of space than ever before. In *Star Struck*, Christian astronomer David Bradstreet and writer Steve Rabey take readers on a guided tour of the biggest story ever, offering both intriguing science lessons and powerful spiritual insights: As we discover more about cosmos, we understand more about the character of our Creator; The more we see the vastness and complexity of the universe, the more we experience awe, wonder, praise, gratitude and humility; Hundreds of Christian astronomers blaze the way into deep exploration of the universe today, discovering and proving God's work in the heavens. Combining a respect and admiration for mainstream astronomy with a zeal for uncovering new details about God's celestial handiwork at its core, this book about stars, planets, asteroids, nebula, comets, dark matter, and the other fingerprints of God will tell you that all of the worlds around you are God's and this world is his home for you.
